

## INDEX TO VOLUME 148

## Alphabetical Table of Contents of Authors

- ABRAMS, PETER A. Limits to the similarity of competitors under hierarchical lottery competition, 211
- BEAUCHAMP, G., and L.-A. GIRALDEAU. Group foraging revisited: information sharing or producer-scrummer game? 738
- BEGON, MICHAEL. See ANDREW WHITE
- BERENBAUM, MAY R. Introduction to symposium issue: on the evolution of specialization, S78
- BERENBAUM, MAY R., COLIN FAVRET, and MARY A. SCHULER. On defining "key innovations" in an adaptive radiation: cytochrome P450s and Papilionidae, S139
- BERGELSON, JOY, THOMAS JUENGER, and MICHAEL J. CRAWLEY. Regrowth following herbivory in *Ipomopsis aggregata*: compensation but not overcompensation, 744
- BERGELSON, JOY, and COLIN B. PURRINGTON. Surveying patterns in the cost of resistance in plants, 536
- BERMAN, TOM. See LEWI STONE
- BERTNESS, MARK D. See SALLY D. HACKER
- BLOWS, MARK W., and ARY A. HOFFMANN. Evidence for an association between nonadditive genetic variation and extreme expression of a trait, 576
- BOUGHTON, DAVID A. See CHRIS D. THOMAS
- BOWERS, ROGER G. See ANDREW WHITE
- BRANDON, ROBERT N., and MARK D. RAUSHER. Testing adaptationism: a comment on Orzack and Sober, 18
- BRIGGS, CHERYL L. See WILLIAM M. MURDOCH
- BROWN, GRANT E. See DOUGLAS P. CHIVERS
- BROWN, J. S. See T. L. S. VINCENT
- BROWN, JOEL S. See ROBERT A. MORGAN
- BROWN, JONATHAN M. See OLLE PELLMYR
- BURD, MARTIN. Foraging performance by *Atta colombica*, a leaf-cutting ant, 597
- . Server system and queueing models of leaf harvesting by leaf-cutting ants, 613
- CALLAWAY, RAGAN M. See JOHN T. GREENLEE
- CARRANZA, JUAN. Sexual selection for male body mass and the evolution of litter size in mammals, 81
- CARTER, KEVIN. See G. S. KLEPPEL
- CHAPIN, F. STUART, III, MARGARET S. TORN, and MASAKI TATENO. Principles of ecosystem sustainability, 1016
- CHESHIRE, DAVID. See BLAINE J. COLE
- CHIVERS, DOUGLAS P., GRANT E. BROWN, and R. JAN F. SMITH. The evolution of chemical alarm signals: attracting predators benefits alarm signal senders, 649
- CLARK, JAMES S. Testing disturbance theory with long-term data: alternative life-history solutions to the distribution of events, 976
- COLE, BLAINE J., and DAVID CHESHIRE. Mobile cellular automata models of ant behavior: movement activity of *Leptothorax allardycei*, 1
- CONDIT, R. See E. A. STACY
- CRAWLEY, MICHAEL J. See JOY BERGELSON
- CURRIE, DAVID J. See ROBERT H. FRASER
- DAVIS, CABELL S. See G. S. KLEPPEL
- DAWKINS, MARIAN STAMP, and TIM GUILFORD. Sensory bias and the adaptiveness of female choice, 937
- DAYAN, TAMAR. See LEWI STONE
- DELPH, LYNDA F., LAURA F. GALLOWAY, and MAUREEN L. STANTON. Sexual dimorphism in flower size, 299
- DE QUEIROZ, KEVIN. Including the characters of interest during tree reconstruction and the problems of circularity

- and bias in studies of character evolution, 700
- DOMBROVSKY, Y. See V. MAZALOV
- DOUGHTY, PAUL. Statistical analysis of natural experiments in evolutionary biology: comments on recent criticisms of the use of comparative methods to study adaptation, 943
- EMLÉN, STEPHEN T. Reproductive sharing in different types of kin associations, 756
- ENDLER, JOHN A., and MARC THÉRY. Interacting effects of lek placement, display behavior, ambient light, and color patterns in three Neotropical forest-dwelling birds, 421
- FAVRET, COLIN. See MAY R. BERENBAUM
- FOSTER, R. B. See E. A. STACY
- FRANK, STEVEN A. Host control of symbiont transmissions: the separation of symbionts into germ and soma, 1113
- FRASER, ROBERT H., and DAVID J. CURRIE. The species richness-energy hypothesis in a system where historical factors are thought to prevail: coral reefs, 138
- FRY, JAMES D. The evolution of host specialization: are trade-offs overrated? 584
- GABRIC, ALBERT. See LEWIS STONE
- GALLOWAY, LAURA F. See LYNDA G. DELPH
- GETTY, THOMAS. The maintenance of phenotypic plasticity as a signal detection problem, 378
- GETZ, WAYNE M., and NICHOLAS J. MILLS. Host-parasitoid coexistence and egg-limited encounter rates, 333
- GIRALDEAU, L.-A. See G. BEAUCHAMP
- GODFRAY, H. C. J. See H. B. WILSON
- GRAY, DAVID A. Carotenoids and sexual dichromatism in North American passerine birds, 453
- GREENLEE, JOHN T., and RAGAN M. CALAWAY. Abiotic stress and the relative importance of interference and facilitation in montane bunchgrass communities in western Montana, 386
- GUILFORD, TIM. See MARIAN STAMP DAWKINS
- HACKER, SALLY D., and MARK D. BERTNESS. Trophic consequences of a positive plant interaction, 559
- HAMRICK, J. L. See E. A. STACY
- HARRISON, RICHARD G. See OLLE PELLMYR
- HASSELL, M. P. See H. B. WILSON
- HE, FANGLIANG, and PIERRE LEGENDRE. On species-area relations, 719
- HESS, GEORGE R. Linking extinction to connectivity and habitat destruction in metapopulation models, 226
- HOFFMANN, ARY A. See MARK W. BLOWS
- HOLT, ROBERT D., and MARK A. MCPEEK. Chaotic population dynamics favors the evolution of dispersal, 709
- HUBBELL, S. P. See E. A. STACY
- HUNTLEY, MARK. Temperature and copepod production in the sea: a reply, 407
- JAENIKE, JOHN. Sex-ratio meiotic drive in the *Drosophila quinaria* group, 237
- JUENGER, THOMAS. See JOY BERGELSON
- KAPPELER, PETER M. Causes and consequences of life-history variation among strepsirrhine primates, 868
- KELLER, LAURENT. See H. KERN REEVE
- KIRKPATRICK, MARK. See MARIA A. SERVEDIO
- KLEPPEL, G. S., CABELL S. DAVIS, and KEVIN CARTER. Temperature and copepod growth in the sea: a comment on the temperature-dependent model of Huntley and Lopez, 397
- LEGENDRE, PIERRE. See FANGLIANG HE
- LEVIN, DONALD A. The evolutionary significance of pseudo-self-fertility, 321
- LEVITAN, DON R. Predicting optimal and unique egg sizes in free-spawning marine invertebrates, 174
- LEWIS, MARK A. See RICHARD R. VEIT
- LINDSAY, SARA M., DAVID S. WETHEY, and SARAH A. WOODIN. Modeling interactions of browsing predation, infaunal activity, and recruitment in marine soft-sediment habitats, 684
- MANGEL, MARC. See JAY A. ROSENHEIM
- MAZALOV, V., N. PERRIN, and Y. DOMBROVSKY. Adaptive search and information updating in sequential mate choice, 123

- McPECK, MARK A. Trade-offs, food web structure, and the coexistence of habitat specialists and generalists, S124  
 —. See ROBERT D. HOLT
- MILLS, NICHOLAS J. See WAYNE M. GETZ
- MITTLER, J. E. See S. J. SCHRAG
- MORGAN, ROBERT A., and JOEL S. BROWN. Using giving-up densities to detect search images, 1059
- MURDOCH, WILLIAM W., CHERYL J. BRIGGS, and ROGER M. NISBET. Competitive displacement and biological control in parasitoids: a model, 807
- NAGELKERKE, CORNELIUS J., and MAURICE W. SABELIS. Hierarchical levels of spatial structure and their consequences for the evolution of sex allocation in mites and other arthropods, 16
- NASON, J. D. See E. A. STACY
- NUHOUT, H. F., and D. E. WHEELER. Growth models of complex allometries in holometabolous insects, 40
- NISBET, ROGER M. See WILLIAM W. MURDOCH
- NONACS, PETER. See JAY A. ROSENHEIM
- OPELL, BRENT D. Functional similarities of spider webs with diverse architectures, 630
- ORZACK, STEVEN HECHT, and ELLIOT SOBER. How to formulate and test adaptationism, 202
- PELLMYR, OLLE, JOHN N. THOMPSON, JONATHAN M. BROWN, and RICHARD G. HARRISON. Evolution of pollination and mutualism in the yucca moth lineage, 827
- PERRIN, N. See V. MAZALOV
- PITNICK, SCOTT. Investment in testes and the cost of making long sperm in *Drosophila*, 57
- PODOLSKY, R. D., and R. R. STRATHMANN. Evolution of egg size in free-spawners: consequences of the fertilization-fecundity trade-off, 160
- PROUT, TIMOTHY, and OUTI SAVOLAINEN. Genotype-by-environment interaction is not sufficient to maintain variation: Levene and the leafhopper, 930
- PURRINGTON, COLIN B. See JOY BERGELSON
- RAUSHER, MARK D. See ROBERT N. BRANDON
- REEVE, H. KERN, and LAURENT KELLER. Relatedness asymmetry and reproductive sharing in animal societies, 764
- RODRÍGUEZ-GIRONÉS, MIGUEL A. Siblicide: the evolutionary blackmail, 101
- ROHDE, KLAUS. Robust phylogenies and adaptive radiations: a critical examination of methods used to identify key innovations, 81
- ROSENHEIM, JAY A., PETER NONACS, and MARC MANGEL. Sex ratios and multifaceted parental investment, 501
- SABELIS, MAURICE W. See CORNELIUS J. NAGELKERKE
- SADLER, TROY D. See KEN SPITZE
- SAVOLAINEN, OUTI. See TIMOTHY PROUT
- SHEEL, D. See T. L. S. VINCENT
- SCHIEPERS, LUE. See ROBERT E. SIMMONS
- SCHLUTER, DOLPH. Ecological cause of adaptive radiation, S40
- SCHRAG, S. J., and J. E. MITTLER. Host-parasite coexistence: the role of spatial refuges in stabilizing bacteriophage interactions, 348
- SCHULER, MARY A. See MAY R. BERENBAUM
- SERVEDIO, MARIA R., and MARK KIRKPATRICK. The evolution of mate choice copying by indirect selection, 848
- SIMBERLOFF, DANIEL. See LEWIS STONE
- SIMMONS, ROBERT E., and LUE SCHIEPERS. Winning by a neck: sexual selection in the evolution of giraffe, 771
- SINGER, MICHAEL C. See CHRIS D. THOMAS
- SMITH, R. JAN F. See DOUGLAS P. CHIVERS
- SOBER, ELLIOT. See STEVEN HECHT ORZACK
- SPITZE, KEN, and TROY D. SADLER. Evolution of a generalist genotype: multivariate analysis of the adaptiveness of phenotypic plasticity, S108
- STACY, E. A., J. L. HAMRICK, J. D. NASON, S. P. HUBBELL, R. B. FOSTER, and R. CONDIT. Pollen dispersal in low-density populations of three Neotropical tree species, 275
- STANTON, MAUREEN L. See LYNDA G. DELPH
- STONE, J. R. The evolution of ideas: a phylogeny of shell models, 904
- STONE, LEWIS, TAMAR DAYAN, and DANIEL SIMBERLOFF. Community-wide assembly patterns unmasked: the importance of species' differing geographical ranges, 997

- STONE, LEWI, ALBERT GABRIC, and TOM BERMAN. Ecosystem resilience, stability, and productivity: seeking a relationship, 892
- STRATHMANN, R. R. See R. D. PODOLSKY
- TANAKA, YOSHINARI. A quantitative genetic model of group selection, 660
- TATENO, MASAKI. See F. STUART CHAPIN III
- THÉRY, MARC. See JOHN A. ENDLER
- THOMAS, CHRIS D. See MICHAEL C. SINGER
- THOMPSON, JOHN N. See OLLE PELLMYR
- TORN, MARGARET S. See F. STUART CHAPIN III
- TRAVIS, JOSEPH. The significance of geographical variation in species interactions, S1
- TSUJI, KAZUKI, and KATSUSUKE YAMAUCHI. Intracolony sex ratio variation with and without local mate competition in an ant, 588
- VEIT, RICHARD R., and MARK A. LEWIS. Dispersal, population growth, and the Allee effect: dynamics of the house finch invasion of eastern North America, 255
- VINCENT, T. L. See T. L. S. VINCENT
- VINCENT, T. L. S., D. SCHEEL, J. S. BROWN, and T. L. VINCENT. Trade-offs and coexistence in consumer-resource models: it all depends on what and where you eat, 1038
- WEDELL, NINA. Mate quality affects reproductive effort in a paternally investing species, 1075
- WETHEY, DAVID S. See SARA M. LINDSAY
- WHEELER, D. E. See H. F. NIJHOUT
- WHITE, ANDREW, ROGER G. BOWERS, and MICHAEL BEGON. Host-pathogen cycles in self-regulated forest insect systems: resolving conflicting predictions, 220
- WHITLOCK, MICHAEL C. The red queen beats the jack-of-all-trades: the limitations on the evolution of phenotypic plasticity and niche breadth, S65
- WILSON, H. B., M. P. HASSELL, and H. C. J. GODFRAY. Host-parasitoid food webs: dynamics, persistence, and invasion, 787
- WOODIN, SARAH A. See SARA M. LINDSAY
- YAMAUCHI, KATSUSUKE. See KAZUKI TSUJI
- YAN, GUIYUN. Parasite-mediated competition: a model of directly transmitted macroparasites, 1089

### Alphabetical Table of Contents of Titles

- Abiotic stress and the relative importance of interference and facilitation in montane bunchgrass communities in western Montana. John T. Greenlee and Ragan M. Callaway, 386
- Adaptive search and information updating in sequential mate choice. V. Mazalov, N. Perrin, and Y. Dombrovsky, 123
- Carotenoids and sexual dichromatism in North American passerine birds. David A. Gray, 453
- Catastrophic extinction of population sources in a butterfly metapopulation. Chris D. Thomas, Michael C. Singer, and David A. Boughton, 957
- Causes and consequences of life-history variation among strepsirrhine primates. Peter M. Kappeler, 868
- Chaotic population dynamics favors the evolution of dispersal. Robert D. Holt and Mark A. McPeck, 709
- Community-wide assembly patterns unmasked: the importance of species' differing geographical ranges. Lewi Stone, Tamar Dayan, and Daniel Simberloff, 997
- Competitive displacement and biological control in parasitoids: a model. William W. Murdoch, Cheryl J. Briggs, and Roger M. Nisbet, 807
- Dispersal, population growth, and the Allee effect: dynamics of the house finch invasion of eastern North America. Richard R. Veit and Mark A. Lewis, 255
- Ecological cause of adaptive radiation. Dolph Schluter, S40
- Ecosystem resilience, stability, and pro-

- ductivity: seeking a relationship. Lewi Stone, Albert Gabric, and Tom Ber-  
man, 892
- Evidence for an association between non-additive genetic variation and extreme expression of a trait. Mark W. Blows and Ary A. Hoffmann, 576
- Evolution of a generalist genotype: multi-variate analysis of the adaptiveness of phenotypic plasticity. Ken Spitze and Troy D. Sadler, S108
- The evolution of chemical alarm signals: attracting predators benefits alarm signal senders. Douglas P. Chivers, Grant E. Brown, and R. Jan F. Smith, 649
- Evolution of egg size in free-spawners: consequences of the fertilization-fecundity trade-off. R. D. Podolsky and R. R. Strathmann, 160
- The evolution of host specialization: are trade-offs overrated? James D. Fry, S84
- The evolution of ideas: a phylogeny of shell models. J. R. Stone, 904
- The evolution of mate choice copying by indirect selection. Maria R. Servadio and Mark Kirkpatrick, 848
- Evolution of pollination and mutualism in the yucca moth lineage. Olle Pellmyr, John N. Thompson, Jonathan M. Brown, and Richard G. Harrison, 827
- Evolutionary responses of a butterfly metapopulation to human and climate-caused environmental variation. Michael C. Singer and Chris D. Thomas, S9
- The evolutionary significance of pseudo-self-fertility. Donald A. Levin, 321
- Foraging performance by *Atta colombica*, a leaf-cutting ant. Martin Burd, 597
- Functional similarities of spider webs with diverse architectures. Brent D. Opell, 630
- Genotype-by-environment interaction is not sufficient to maintain variation: Levene and the leafhopper. Timothy Prout and Outi Savolainen, 930
- Group foraging revisited: information sharing or producer-scrourer game? G. Beauchamp and L.-A. Giraldeau, 738
- Growth models of complex allometries in holometabolous insects. H. F. Nijhout and D. E. Wheeler, 40
- Hierarchical levels of spatial structure and their consequences for the evolution of sex allocation in mites and other arthropods. Cornelius J. Nagelkerke and Maurice W. Sabelis, 16
- Host control of symbiont transmissions: the separation of symbionts into germ and soma. Steven A. Frank, 1113
- Host-parasite coexistence: the role of spatial refuges in stabilizing bacteriophage interactions. S. J. Schrag and J. E. Miller, 348
- Host-parasitoid coexistence and egg-limited encounter rates. Wayne M. Getz and Nicholas J. Mills, 333
- Host-parasitoid food webs: dynamics, persistence, and invasion. H. B. Wilson, M. P. Hassell, and H. C. J. Godfray, 787
- Host-pathogen cycles in self-regulated forest insect systems: resolving conflicting predictions. Andrew White, Roger G. Bowers, and Michael Begon, 220
- How to formulate and test adaptationism. Steven Hecht Orzack and Elliot Sober, 202
- Including the characters of interest during tree reconstruction and the problems of circularity and bias in studies of character evolution. Kevin de Queiroz, 700
- Interacting effects of lek placement, display behavior, ambient light, and color patterns in three Neotropical forest-dwelling birds. John A. Endler and Marc Thry, 421
- Intracolony sex ratio variation with and without local mate competition in an ant. Kazuki Tsuji and Katsusuke Yamauchi, 588
- Introduction to symposium issue: on the evolution of specialization. May R. Berenbaum, S78
- Investment in testes and the cost of making long sperm in *Drosophila*. Scott Pitnick, 57
- Limits to the similarity of competitors under hierarchical lottery competition. Peter A. Abrams, 211
- Linking extinction to connectivity and hab-

- itat destruction in metapopulation models. George R. Hess, 226
- The maintenance of phenotypic plasticity as a signal detection problem. Thomas Getty, 378
- Mate quality affects reproductive effort in a paternally investing species. Nina Wedell, 1075
- Mobile cellular automata models of ant behavior: movement activity of *Leptothorax allardycei*. Blaine J. Cole and David Cheshire, 1
- Modeling interactions of browsing predation, infaunal activity, and recruitment in marine soft-sediment habitats. Sara M. Lindsay, David S. Wetthey, and Sarah A. Woodin, 684
- On defining "key innovations" in an adaptive radiation: cytochrome P450s and Papilionidae. May R. Berenbaum, Colin Favret, and Mary A. Schuler, S139
- On species-area relations. Fangliang He and Pierre Legendre, 719
- Parasite-mediated competition: a model of directly transmitted macroparasites. Guiyun Yan, 1089
- Pollen dispersal in low-density populations of three Neotropical tree species. E. A. Stacy, J. L. Hamrick, J. D. Nason, S. P. Hubbell, R. B. Foster, and R. Condit, 275
- Predicting optimal and unique egg sizes in free-spawning marine invertebrates. Don R. Levitan, 174
- Principles of ecosystem sustainability. F. Stuart Chapin III, Margaret S. Torn, and Masaki Tateno, 1016
- A quantitative genetic model of group selection. Yoshinari Tanaka, 660
- The red queen beats the jack-of-all-trades: the limitations on the evolution of phenotypic plasticity and niche breadth. Michael C. Whitlock, S65
- Regrowth following herbivory in *Ipomopsis aggregata*: compensation but not overcompensation. Joy Bergelson, Thomas Juenger, and Michael J. Crawley, 744
- Relatedness asymmetry and reproductive sharing in animal societies. H. Kern Reeve and Laurent Keller, 764
- Reproductive sharing in different types of kin associations. Stephen T. Emlen, 756
- Robust phylogenies and adaptive radiations: a critical examination of methods used to identify key innovations. Klaus Rohde, 481
- Sensory bias and the adaptiveness of female choice. Marian Stamp Dawkins and Tim Guilford, 937
- Server system and queueing models of leaf harvesting by leaf-cutting ants. Martin Burd, 613
- Sex-ratio meiotic drive in the *Drosophila quinaria* group. John Jaenike, 237
- Sex ratios and multifaceted parental investment. Jay A. Rosenheim, Peter Nonacs, and Marc Mangel, 501
- Sexual dimorphism in flower size. Lynda F. Delph, Laura F. Galloway, and Maureen L. Stanton, 299
- Sexual selection for male body mass and the evolution of litter size in mammals. Juan Carranza, 81
- Siblicide: the evolutionary blackmail. Miguel A. Rodríguez-Gironés, 101
- The significance of geographical variation in species interactions. Joseph Travis, S1
- The species richness-energy hypothesis in a system where historical factors are thought to prevail: coral reefs. Robert H. Fraser and David J. Currie, 138
- Statistical analysis of natural experiments in evolutionary biology: comments on recent criticisms of the use of comparative methods to study adaptation. Paul Doughty, 943
- Surveying patterns in the cost of resistance in plants. Joy Bergelson and Colin B. Purrington, 536
- Temperature and copepod growth in the sea: a comment on the temperature-dependent model of Huntley and Lopez. G. S. Kleppel, Cabell S. Davis, and Kevin Carter, 397
- Temperature and copepod production in the sea: a reply. Mark Huntley, 407
- Testing adaptationism: a comment on Or-

- zack and Sober. Robert N. Brandon and Mark D. Rausher, 189
- Testing disturbance theory with long-term data: alternative life-history solutions to the distribution of events. James S. Clark, 976
- Trade-offs and coexistence in consumer-resource models: it all depends on what and where you eat. T. L. S. Vincent, D. Scheel, J. S. Brown, and T. L. Vincent, 1038
- Trade-offs, food web structure, and the co-existence of habitat specialists and generalists. Mark A. McPeck, S124
- Trophic consequences of a positive plant interaction. Sally D. Hacker and Mark D. Bertness, 559
- Using giving-up densities to detect search images. Robert A. Morgan and Joel S. Brown, 1059
- Winning by a neck: sexual selection in the evolution of giraffe. Robert E. Simmons and Lue Scheepers, 771
